DevOps Engineer with hands-on experience in cloud infrastructure, Linux & Windows server administration, CI/CD automation, and production operations. Skilled in managing AWS environments containerized workloads, DNS/SSL configurations and monitoring.

PROFESSIONAL EXPERIENCE

DevOps Engineer

GreenSign

Sep 25 – Present

- Managing production and staging cloud infrastructure on GCP for a digital signature and PKI-based SaaS platform.
- Administer Linux and Windows servers, including patching, monitoring, and security hardening.
- Collaborating closely with QA, backend, and frontend teams to resolve production issues efficiently.
- Configure and manage DNS, SSL/TLS certificates, and domain routing for multiple customer-facing environments.
- Implement monitoring, logging, and alerting using GCP Observability.
- Deploying, configuring, and maintaining self-hosted SharePoint On-Prem environments, including IIS configuration, application pools, service management, and farm-level troubleshooting.
- Automated Jira issue transitions, status updates, and notifications based on deployment, incident, and QA workflows.

Associate DevOps Engineer

International Franchise Business Corp. (Remote – US)

Jan 25 – Sep 25

- Strengthened AWS-based cloud infrastructure, enhancing reliability, cost-efficiency, and scalability across environments.
- Streamlined CI/CD pipelines via GitHub Actions & OIDC, accelerating delivery cycles and improving developer productivity.
- Managed containerized deployments using Docker & ECS, ensuring zero-downtime rollouts and consistent 99.9% uptime.
- Automated end-to-end infrastructure provisioning with IaC tools like Terraform, improving auditability and reducing manual errors.

TECHNICAL SKILLS

- **Cloud Platforms:**
AWS (EC2, S3, VPC),
AWS Lambda
- **Programming Languages:** Python, Bash Scripting
- **Version Control:**
Git, GitHub
- **Monitoring & Logging:**
Prometheus, ELK Stack
- **Operating Systems:** Linux (Ubuntu, CentOS), Windows
- **Networking:**
TCP/IP, DNS, VPN, Load Balancers

ACHIEVEMENTS

- Deployed AWS services (EC2, S3, VPC) for scalable cloud solutions.
- Migrated a legacy app to **Docker**, enhancing deployment.
- Automated CI/CD pipelines using **Jenkins**.

EDUCATION

Mohammad Ali Jinnah University- B.S (Computer Science) (2022-2025)
